

## Maryland Medicaid Mental Health Formulary Effective July 1, 2011

Listed on the following pages are mental health drugs which are carved out of the Managed Care Organization (MCO) pharmacy benefit. Some of these drugs are subject to prior authorization requirements of the Preferred Drug List.

Refer to <http://www.dhmh.state.md.us/mma/mpap/prefdruglist.html> for a complete listing of all drugs subject to preferred drug list requirements.

All drugs from American Hospital Formulary Service (AHFS) therapeutic classes included in the Mental Health Formulary, including specific drugs that may not be listed below, are carved out of the MCO pharmacy benefit and are payable as fee-for-service through Maryland Medical Assistance, *unless otherwise noted*.

**The following seven drugs, which may be used for some mental health indications, are not payable fee-for-service (unless otherwise noted) and are the responsibility of the HealthChoice MCOs for their enrollees, regardless of the prescriber.**

Leuprolide acetate*	Naltrexone	Liothyronine
Clonidine**	Medroxyprogesterone*	Disulfiram
Guanfacine**		

\*When leuprolide acetate or medroxyprogesterone are used for the treatment of adult males with certain diagnosed behavioral disorders, these two drugs will be paid fee-for-service, but will require preauthorization (PA) through the University of Maryland School of Pharmacy CAMP program at 410-706-3431.

\*\* Generic guanfacine (Tenex) and clonidine (Catapres) remain drugs for which coverage is the responsibility of the member's Managed Care Organization. For recipients 6 – 17 years old, the extended release form of guanfacine (Intuniv) and clonidine (Kapvay) will be added to the mental health formulary and be billed fee-for-service. For individuals not in this age range, Intuniv and Kapvay will continue to be part of the MCO pharmacy benefit.

*Please note: Brand drugs which currently do not have a generic equivalent are listed by brand name in italics. Those drugs currently available generically are listed by generic name. All brand drugs, which are available as multi-source generics, require prior approval and completion of a Maryland Medwatch Form unless otherwise noted on the Maryland Medicaid Preferred Drug List.*
